

The Sullivan County Schools are proud to be able to serve you and your children and we will continually strive to provide a safe learning environment for them. The safety of your child and all children in our schools as well as the safety of the school staff and support personnel is very important to us. In order to maintain a safe environment for our children to study and learn, it is necessary that we practice our emergency and crisis response plans by having drills designed to exercise or procedures.

Due to the current national climate that we live in, we will be conducting various drills throughout the school year, and each subsequent school year. This document is to help you understand the importance of this as well as to understand each type of drill.

The students and staff of your school will be practicing 4 primary emergency drills each year. They are “FIRE DRILLS”; “LOCKDOWN DRILLS”; “SHELTER-IN-PLACE DRILLS”; and “EVACUATION DRILLS”. Each type of drill is explained below.

### **FIRE DRILLS**

The school will conduct a “fire drill” each month that school is in session. This is a Fire Code requirement as well as a requirement for all Pennsylvania public schools. We want each student to understand and be aware of the importance of this drill and not be afraid when the fire alarm is sounded. By practicing they will know what to do and how to do it.

### **LOCKDOWN DRILLS**

The school will conduct a “Lockdown Drill” periodically throughout each school year. This type of drill will secure the school building and safely shelter all students, staff and visitors inside the building. The purpose of this drill is to keep the students safe from any danger outside or inside the building. During a “lockdown drill” all of the perimeter doors to the school building will be locked and will remain locked until the danger or issue outside or inside the building is removed. To enable everyone to remain safe, no one will be allowed to enter the building or leave the building until the drill is completed.

### **SHELTER-IN-PLACE DRILLS**

The “Shelter-in-Place” drill will be conducted each school year. The purpose of this drill is to be prepared to move to a safe location within the building in case a severe weather or tornados.

### **EVACUATION DRILLS**

During an “Evacuation Drill”, students will be safely escorted along a designated evacuation route to one of our pre-determined evacuation sites. At the conclusion of the drill, all students will be escorted back to the school.

For the safety of everyone involved and to maintain order, we respectfully ask that you would abide by the following:

- ✓ Do not come to the school campus
- ✓ Do not call the school offices (as they will be busy with the drill or actual emergency)
- ✓ Do not contact students or staff members via cell phone or social media (as they will be busy with the drill or actual emergency)
- ✓ Avoid social media posts. Correct information will be disseminated through our automated system as soon as possible in the time of an actual emergency.
- ✓ Please make sure that your contact information is current at all times so that you can be reached without delay in the event of an emergency.
- ✓ In the event of an actual emergency evacuation, you will receive notification where to pick up your child as soon as practicable.
- ✓

Please remember that these safety practice drills are done to help maintain our schools as a safe place to learn and work.
